

OBGY 602 General Obstetrics

Elective Description

This elective provides students with clinical exposure, observation and training to further their understanding of general obstetrics. Students focus on the diagnosis, treatment and management of common and uncommon obstetrical conditions with a greater depth. During the clerkship, students will continue to improve their abilities to obtain, record, analyze, and communicate clinical information.

Credit: 2-4 semester credits

Prerequisite: OBGY 500

Elective Structure: Students will observe and participate in patient evaluation and care. Students may experience normal and abnormal labor and delivery, caesarean delivery, operative vaginal delivery, antepartum conditions and postpartum conditions. Student may also experience prenatal care in an office setting.
